

How to navigate a High-intensity Activated cross Walk (HAWK) signal

The signal is **off** when no pedestrians are using it.

The yellow warning light flashes to warn drivers to begin slowing.

The yellow **light is solid** to warn drivers to come to a stop.

Two solid red lights stop drivers so pedestrians may cross the intersection.

The **red lights begin to flash,** indicating drivers may pull up to the stop line, stop, verify the crosswalk is clear and then proceed through the intersection. All cars must stop before proceeding through the flashing reds.

The **signal turns off** again, indicating cars may proceed without stopping.
